this ibm redbooks publication discusses z vm and linux operations from the perspective of the z os programmer or system programmer although other books have been written about many of these topics this book gives enough information about each topic to describe z vm and linux on ibm system z operations to somebody who is new to both environments this book is intended for z os programmers and system

programmers who are transitioning to the z vm and linux on system z environments and who want a translation guide for assistance we base this book on our experiences using system z10 enterprise edition z vm version 5 3 rsu 0701 and novell suse linux enterprise server sles 10 on system z

oils and fats are almost ubiquitous in food processing whether naturally occurring in foods or added as ingredients that bring functional benefits whilst levels of fat intake must be controlled in order to avoid obesity and other health problems it remains the fact that fats along with proteins and carbohydrates are one of the three macronutrients and therefore an essential part of a healthy diet the ability to process oils and fats to make them acceptable as part of our food supplies is a key component

in our overall knowledge of them without this ability the food that we consume would be totally different and much of the flexibility available to us as a result of the application of processing techniques would be lost obviously we need to know how to process fatty oils but we also need to know how best to use them once they have been processed this second edition of edible oil processing presents a valuable overview of the technology and applications behind the subject it covers the latest technologies which address new environmental and nutritional requirements as well as the current state of world edible oil markets this book is intended for food scientists and technologists who use oils and fats in food formulations as well as chemists and technologists working in edible oils and fats processing

ceramic fuel cells commonly known as solid oxide fuel cells sofcs have been under development for a broad range of electric power generation applications the most attractive feature of the sofcs is its clean and efficient production of electricity from a variety of fuels the sofcs has the potential to be manufactured and operated cost effectively the widening interest in this technology thus arises from the continuing need to develop cleaner and more efficient means of converting energy sources into useful forms this topical book provides a comprehensive treatise on solid oxide fuel cells and succeeds successfully in filling the gap in the market for a reference book in this field directed towards scientists engineers and technical managers working with sofcs as well as ceramic devices based on

conducting materials and in related fields the book will also be invaluable as a textbook for science and engineering courses

mick cooper and john mcLeod pioneer a major new framework for counselling theory practice and research the pluralistic approach this model breaks away from the orientation specific way in which counselling has traditionally been taught reflecting and responding to shifts in counselling and psychotherapy training as accessible and engaging as ever cooper and mcLeod argue that there is no one right way of doing therapy and that different clients need different things at different times by identifying and demonstrating the application of a range of therapeutic methods the book outlines a flexible framework for practice within which appropriate methods can be selected depending on the client s individual needs

and the therapist's knowledge and experience this is a must read for anybody training or practising in the counselling or helping professions it should not be missed
