speaking at a time of intense war in europe rudolf steiner reveals the spiritual roots of the crises of our times and the means by which we can overcome them since 1879 steiner tells us that backward angels or spirits of darkness who were forced out of the heavens and made their abode on earth following their defeat in a forty year battle with the archangel michael have influenced human minds it is now possible for human beings to awaken more consciously to the truth of these profound changes and thus inwardly counter the fallen spirits influences we can come to the realization that definite spiritual causes lie behind earthly events in our rapidly changing times in these fourteen lectures given at the end of 1917 following four years of war in europe steiner speaks on the complex spiritual forces behind the world war i humanity s attempts to build theoretically perfect social orders and the many divisions and disruptions that would continue on earth into our own time humanity in general was asleep to the fact that fallen spirits cast from the spiritual worlds had become intensely active on earth this manifested mainly in human thinking and perception of the surrounding world however the defeat and fall of these spirits also ensured that a science of the spirit would always be available to humanity

searching for dark matter with cosmic gamma rays summarizes the evidence for dark matter and what we can learn about its particle nature using cosmic gamma rays it has almost been 100 years since fritz zwicky first detected hints that most of the matter in the universe that doesn t directly emit or reflect light since then the observational evidence for dark matter has continued to grow dark matter may be a new kind of particle that is governed by physics beyond our standard model of particle physics in many models dark matter annihilation or decay produces gamma rays there are a variety of instruments observing the gamma ray sky from tens of mev to hundreds of tev some make deep focused observations of small regions while others provide coverage of the entire sky each experiment offers complementary sensitivity to dark matter searches in a variety of target sizes locations and dark matter mass scales we review results from recent gamma ray experiments including anomalies some have attributed to dark matter we also discuss how our gamma ray observations complement other dark matter searches and the prospects for future experiments

the cuban revolution of 1959 was a benchmark of triumph and a harbinger of tragedy to come rather than herald a new era of cuba joining the world community of nations as a paragon of democracy as many fervently hoped and believed it would it became instead a new stage in authoritarian rule in the western hemisphere for more than a half century since then cuba has been defined by the capacity of a single family to command and determine the fate of a nation and to do so with a minimum of opposition incredibly even those professing adherence to democratic norms have been ready to forgive the dictator his excesses this volume explains the theory and practice of this absence of internal opposition and the persistence of external support for the castro family and its entourage the long night of dark intent is chronological in order with the author indicating major points in each of the five decades covered the volume covers five centers of system analysis economics politics society military and ideology who or what determines events and decisions is the stuff of real history it is precisely due to variability in causal chains in society that we have huge variance in levels of predictability the course of the cuban revolution gives strong support for such an approach to the castro era this is a unique unflinching account with a strong emphasis on the importance of u s policy decisions over time

there are two types of energy that exist within space dark energy and dark matter dark energy is a homogenous eternal potential energy that exists below zero degree kelvin temperature in absolute static equilibrium phase of energy dark matter is the dynamic phase of dark energy above zero degree kelvin temperature as kinetic energy smallest unit of kinetic energy particle is a one dimensional photon and known as the god particle all elements are formed by these god particles we human beings are also made with baryonic hydrogen atoms arranged in elemental and molecular forms that are all made with god particles dark energy to dark matter conversion leads to contraction of energy space and dark matter to dark energy conversion leads to expansion of energy space like ice to water conversion and vice versa
