Being a University 2010-10-06 there is no single idea of the university ever since its medieval origin the concept of the university has continued to change the metaphysical university gave way successively to the scientific university and then to the corporate and the entrepreneurial university but what then might lie ahead being a university both charts

this conceptual development and examines the future possibilities for the idea of the university ronald barnett pursues this quest through an exploration of pairs of contending concepts that speak to the idea of the university such as space and time being and becoming and culture and anarchy on this foundation is developed an imaginative exposition of possible ideas of the university including the liquid university and the authentic university in the course of this inquiry it is argued that any thought that the idea of the entrepreneurial university represents the end point of the evolution of the idea of the university has to be abandoned the entrepreneurial university is excessively parochial and ill matched to the challenges facing the university a responsibility of the university is precisely that of working out an imaginative conception of its future possibilities the boldest and largest thinking is urgently required the fullest expression of the university s possibilities lies in a reclamation of the universal aspirations that lay in earlier ideas of the university the ecological university represents just such a universal aspiration suited to the unfolding demands of the future being a university will be of wide interest to institutional leaders and managers higher education planners academics in all disciplines and students of higher education in educational policy and politics and the philosophy sociology and theory of education and indeed anyone who believes in the future of the university
