this book constitutes the refereed proceedings of the international conference on analytic tableaux and related methods tableaux 99 held in saratoga springs ny usa in june 1999 the volume presents 18 revised full papers and three system descriptions selected from 41 submissions also included are system comparisons and abstracts of an invited paper and of two tutorials all current issues surrounding mechanization of reasoning with tableaux and similar methods are addressed ranging from theoretical foundations to implementation and systems development and applications as well as covering a broad variety of logic calculi as application areas formal verification of software and computer systems deductive databases knowledge representation and systems diagnosis are covered

Automated Reasoning with Analytic Tableaux and Related Methods 2003-07-31

why a book on latchup latchup has been and continues to be a potentially serious cmos reliability concern this concern is becoming more widespread with the ascendancy of cmos as the dominant vlsi technology particularly as parasitic bipolar characteristics continue to improve at ever smaller dimensions on silicon wafers with ever lower defect densities although many successful parts have been marketed latchup solutions have often been ad hoc although latchup avoidance techniques have been previously itemized there has been little quantitative evaluation of prior latchup fixes what is needed is a more general more systematic treatment of the latchup problem because of the wide variety of cmos technologies and the long term interest in latchup some overall guiding principles are needed appreciating the variety of possible triggering mechanisms is key to a real understanding of latchup this work reviews the origin of each and its effect on the parasitic structure each triggering mechanism is classified according to a new taxonomy

Latchup in CMOS Technology 2013-03-14
