Introduction to Genetic Algorithms 1962 the us bankruptcy code s chapter 11 procedure is both in practice and conceptually the most important insolvency procedure worldwide many countries including the netherlands look at chapter 11 for inspiration in revising their own insolvency laws chapter 11 is however itself up for revision on december 4 2014 the american bankruptcy institute abi issued breaking news for the restructuring and insolvency community in the usa when it presented its final report and recommendations on the reform of chapter 11 this article discusses the most principled recommendations that will also be of the most relevance for legislatures and policy makers drawing inspiration from chapter 11

first of all the recommendation is discussed for introducing the figure of a so called estate neutral as a supplement to the debtor in possession model secondly the introduction of significant restrictions on 363 sales selling all or nearly of the assets restrictions deal both with timing and creditor involvement as a third recommendation we single out the introduction of a so called redemption option this option seeks to restore in part the balance between secured and unsecured creditors by giving the immediate out of the money creditors a claim on encumbered assets equal to a redemption option finally most novel and most interesting from a company law perspective is the introduction of an equity retention plan for small and medium sized enterprises s the plan seeks to strike a balance between protecting the statutory order of distributions which would normally prevent a distribution to shareholders on the one hand and providing an incentive to shareholders necessary for the successful reorganisation of the company to remain involved on the other this recommendation thereby provides an exception to the absolute priority rule which usually has as the effect of wiping shareholders out in case of insolvency
