this book helps in raising and sustaining motivation for better grades these books are the best possible match to the specification motivating readers by making maths easier to learn they include complete past exam papers and student friendly worked solutions which build up to practice questions for all round exam preparation these books also feature real life applications of maths through the life links and why pages to show readers how this maths relates presenting opportunities to stretch and challenge more apply students each book includes a live text cdrom which features fully worked solutions examined step by step animations for key learning points and revision support through the exam cafe publisher s description

Восьмой Международный конгресс по стратиграфии и геологии карбона. Москва, 8–13 сентября 1975 г. Труды. Том 3. Палеонтологическая характеристика основных подразделений карбона

2007

woo choong kim went from being a penniless paperboy to founding a business that now has higher sales than xerox and sony 22 billion worldwide last year here are his management and leadership secrets surefire strategies proven tips simple parables and unique techniques this is one of the most successful books in korean history 1 3 million copies sold to date

1951

a very clear and engaging introduction to a contemporary analysis of race and racism s this text effectively combines key theoretical perspectives with vivid contemporary examples dr rebecca barnes university of derby fantastic book for helping students get past the stuntedness of the term racism to understand the way in which racisms are part of our social practices and institutions dr lucy michael hull university this is a solid text covering the topic in a thoughtful manner studying and teaching racism is a complex issue and this book is a very good resource dr sanjay sharma brunel university we hear much about race and racism in public discourse but the terms are frequently used without clear definitions or practical examples of how these phenomena work racisms an introduction introduces practical methods which enable students to think coherently and sociologically about this complex feature of the global landscape steve garner argues that there is no single monolithic object of analysis but rather a plural set of ideas and practices that result in the introduction of race into social relations this differs over time and from one place to another focussing on the basics this book defines race racism

institutional racism and racialization provides examples of how these function in fields like the natural sciences and asylum clearly sets out theoretical arguments around collective identities race class gender nation religion uses empirical case studies including some drawn from the author s own fieldwork points students toward sources of further web and text based information engaging and accessible this book provides a signposted route into key elements of contemporary debates it is an ideal introduction for undergraduates studying race and ethnicity social divisions and stratification
