from the renowned and bestselling author of a history of god a sweeping exploration of religion s connection to violence for the first time in american history religious self identification is on the decline some have cited a perception that began to grow after september 11 that faith in general is a source of aggression intolerance and divisiveness something bad for society but how accurate is that view and does it apply equally to all faiths in these troubled times we risk basing decisions of real and dangerous consequence on mistaken understandings of the faiths subscribed around us in our immediate community as well as globally and so with her deep learning and sympathetic understanding karen armstrong examines the impulse toward violence in each of the world s great religions the comparative approach is new while there have been plenty of books on jihad or the crusades this book lays the christian and the islamic way of war side by side along with those of buddhism hinduism confucianism daoism and judaism each of these faiths arose in agrarian societies with plenty of motivation for violence landowners had to lord it over peasants and warfare was essential to increase one s landholdings the only real source of wealth before the great age of trade and commerce in each context it fell to the priestly class to legitimize the actions of the state and so the martial ethos became bound up with the sacred at the same time however their ideologies developed that ran counter to the warrior code around sages prophets and mystics within each tradition there grew up communities that represented a protest against the injustice and violence endemic to agrarian society this book explores the symbiosis of these 2 impulses and its development as these confessional faiths came of age the aggression of secularism has often damaged religion and pushed it into a violent mode but modernity has also been spectacularly violent and so armstrong goes on to show how and in what measure religions in their relative maturity came to absorb modern belligerence and what hope there might be for peace among believers in our time

it is the most persistent myth of our time religion is the cause of all violence but history suggests otherwise karen armstrong former roman catholic nun and one of our foremost scholars of religion speaks out to disprove the link between religion and bloodshed religion is as old as humanity fields of blood goes back to the stone age hunter gatherers and traces religion through the centuries from medieval crusaders to modern day jihadists the west today has a warped concept of religion we regard faith as a personal and private matter but for most of history faith has informed people s entire outlook on life and often been inseparable from politics humans undoubtedly have a natural propensity for aggression the founders of the largest religions jesus buddha the rabbis of early judaism the prophet muhammad aimed to curb violence and build a more peaceful and just society but with our growing greed for money and wealth came collective violence and warfare with the arrival of the modern all powerful secular state humanity s destructive potential has begun to spiral out of control is humanity on the brink of destroying itself fields of blood is a celebration of the ancient religious ideas and movements that have promoted peace and reconciliation across millennia of civilization

there is widespread confusion about the nature of religious truth for the first time in history a significantly large number of people want nothing to do with god militant atheists preach a gospel of godlessness with the zeal of missionaries and find an eager audience tracing the history of faith from the palaeolithic age to the present karen armstrong shows that meaning of words such as belief faith and mystery has been entirely altered so that atheists and theists alike now think and speak about god and indeed reason itself in a way that our ancestors would have found astonishing does god have a future karen armstrong examines how we can build a faith that speaks to the needs of our troubled and dangerously polarised world

from one of the world's leading writers on religion and the highly acclaimed author of the bestselling a history of god the battle for god and the spiral staircase comes a major new work a chronicle of one of the most important intellectual revolutions in world history and its relevance to our own time in one astonishing short period the ninth century bce the peoples of four distinct regions of the civilized world created the religious and philosophical traditions that have continued to nourish humanity into the present day confucianism and daoism in china hinduism and buddhism in india monotheism in israel and philosophical rationalism in greece historians call this the axial age because of its central importance to humanity's spiritual development now karen armstrong traces the rise and development of this transformative moment in history examining the brilliant contributions to these traditions made by such figures as the buddha socrates confucius and ezekiel armstrong makes clear that despite some differences of emphasis there was remarkable consensus among these religions and philosophies each insisted on the primacy of compassion over hatred and violence she illuminates what this family resemblance reveals about the religious impulse and quest of humankind and she goes beyond spiritual archaeology delving into the ways in which these axial age beliefs can present an instructive and thought provoking challenge to the ways we think about and practice religion today a revelation of humankind's early shared imperatives yearnings and inspired solutions as salutary as it is fascinating excerpt from the great transformation in our global world we can no longer afford a parochial or exclusive vision we must learn to live and behave as though people in remote parts of the globe were as important as ourselves the sages of the axial age did not create their compassionate ethic in idyllic circumstances each tradition developed in societies like our own that were torn apart by violence and warfare as never before indeed the first catalyst of religious change was usually a visceral rejection of the aggression that the sages witnessed all around them all the great traditions that were created at this time are in agreement about the supreme importance of charity and benevolence and this tells us something important about our humanity

drawing on a wide range of material ranging from the spiritual character of the world religions to the findings of contemporary neuroscience karen armstrong argues that compassion is hardwired into our brains yet is constantly pushed back by our more primitive instincts for selfishness and survival since time immemorial religion has enhanced our altruistic tendencies all faiths insist that the golden rule is the test of true spirituality always treat others as you wish to be treated yourself taking as her starting point the teachings of the great world religions karen armstrong demonstrates in twelve practical steps how we can bring compassion to the forefront of our lives these steps both reveal the inadequacies of our knowledge of ourselves and others and enable us to unlock our potential for understanding empathy and altruism that can be translated into acts of kindness and charity they culminate in the most radical and challenging of all religious maxims love your enemy yet in today's world compassion is no longer a luxury but in the words of martin luther king an absolute necessity for our survival practising these steps will not change our lives overnight and turn us into saints or sages the attempt to become a more compassionate human being is a lifelong project yet karen armstrong argues that compassion is inseparable from humanity and by transcending the limitations of selfishness on a daily basis we will not only make a difference in the world but also lead happier more fulfilled lives

one of the great philosophers of the 20th century josef pieper gives a penetrating introduction and guide to the life and works of perhaps the greatest philosopher ever st thomas aquinas pieper provides a biography of aquinas an overview of the 13th century he lived in and a wonderful synthesis of his vast writings pieper shows how aquinas reconciled the pragmatic thought of aristotle with the church proving that realistic knowledge need not preclude belief in the spiritual realities of religion according to pieper the marriage of faith and reason proposed by aquinas in his great synthesis of a theologically founded worldliness was not merely one solution among many but the great principle expressing the essence of the christian west pieper reveals his extraordinary command of original sources and excellent secondary materials as he illuminates the thought of the great intellectual doctor of the church the purpose of these lectures is to sketch against the background of his times and his life a portrait of thomas aquinas as he truly concerns philosophical minded persons today not merely as a historical personage but as a thinker who has something to say to our own era i earnestly hope that the speculative attitude which was thomas most salient trait as christianity s universal teacher will emerge clearly and sharply from my exposition josef pieper

Clayborne Carson, founding director of the Martin Luther King Jr. Research and Education Institute at Stanford University, Bayard Rustin was a committed but very complicated person. This marvelously annotated collection of letters explains the spirit and evolution of the thoughts and actions of an often overlooked key figure in the 20th-century civil and human rights movement. Mary Frances Berry, Geraldine Segal, professor of American Social Thought, University of Pennsylvania, and former chair, United States Commission on Civil Rights, all aspects of Rustin's experiences are captured in these letters, including his struggles with opponents dedicated to silencing him as an international symbol of nonviolent protests against racial injustice.
