On the Same Track 2014-03-18

a public school principal s account of the courageous leaders who have dismantled the tracking systems in their schools in order to desegregate classrooms what would happen if a school eliminated the tracks that rank students based on their perceived intellectual abilities would low achieving students fall behind and become frustrated would their higher achieving peers suffer from a watered down curriculum or is tracking itself the problem a growing body of research shows that tracking doesn t increase learning for the minority and low income students who are overrepresented in low track classrooms this de facto segregation has led many civil rights advocates to argue that tracking is turning back the clock on equal education as a principal at a new york high school carol corbett burris believed that the curriculum for the best students was the best curriculum for all she helped lead a bold plan to eliminate tracking from her school and the results couldn t have been further from the doom and gloom scenarios of tracking proponents instead there was a dramatic improvement in the achievement of all students across racial and socioeconomic divisions and a near elimination of the achievement gap today due to those efforts international baccalaureate english is the twelfth grade curriculum for south side students and all students take the same challenging courses together to prepare them for college in on the same track burris draws on her own experience on the experiences of other schools and on the latest research to make an impassioned case for detracking not only does the practice of tracking fail to benefit lower tracked students as burris shows but it also results in the resegregation of classrooms furthermore she argues that many of today s popular reforms emanate from the same sort and select mentality that reinforces social stratification based on race and class on the same track is a rousing controversial and yet optimistic account of how we need to change our assumptions and policies if we are to live up to the promise of democratic public education only by holding all students to the same high standards can we ensure that all have the same opportunity to live up to their full potential from the hardcover edition
