the author noted after more than 35 years of teaching that many medical nursing and physical therapy students as well as generalists feared or avoided neurology and neurological patients neurology in our midst is a form of interventional neurology book that addresses this problem the writing style deviates from the usual medical books the content simplifies and avoids obfuscation of the language of neurology it emphasizes

understanding of how the central nervous system cns controls our daily activities and if injured or afflicted by diseases how they manifest bedside examinations to unmask the aberrant functions are detailed and the abnormalities are explained for the purpose of localization cns anatomic structures are dissected into chapters and paired with clinical examples and neuroanatomic correlations the waterloo of neurology is the understanding and evaluation of unconscious patients so the book addressed this difficulty the cerebrospinal fluid circulation and cerebrovascular neuroanatomy are discussed and correlated with hydrocephalus and stroke neuroanatomy and clinical neurology lectures will be more interesting and meaningful if one reads the entire book before attending them

crime stories attract audiences and social buzz but they also serve as prisms for perceived threats as immigration technological change and globalization reshape our world anxiety spreads because journalism plays a role in how the public adjusts to moral and material upheaval this unease raises the ethical stakes reporters can spread panic or encourage reconciliation by how they tell these stories murder in our midst uses crime coverage in select north american and western european countries as a key to examine culturally constructed concepts like privacy public public right to know and justice working from close readings of news coverage codes of ethics and style guides and personal interviews with almost 200 news professionals this book offers fertile material for a provocative conversation we use our findings to divide the ten countries studied into three media models we explore what the differing coverage decisions suggest about underlying attitudes to criminals and crime and how justice in a democracy is best served today journalists work can be disseminated around the world without any consideration of whether what s being told or how might dissolve cultural differences or undermine each community s right to set its own standards to best reflect its citizens values at present unique reporting practices persist among our three models but the internet and social media threaten to dissolve distinctions and the cultural values they reflect we need a journalism that both opens local conversations and bridges differences among nations this book is a first step in that direction

it s time we all knew within the deep chasm of what we know and should know exists a fissure with an alternate reality when seen and understood this otherwise inexplicable conspiracy tells its own tale complete with a hidden history of inconceivable and improbable strangeness that ensures it is otherwise disbelieved until now this tale has remained secret despite being so integral to who we are and how we became those complicit those who knew and know have deleted all records so this remains a fanciful tale that can never be verified what is written may undoubtedly be dismissed as conjecture and not given merit or further consideration this may also be read as made up but when contemplated further it becomes something so familiar something we all seem to subconsciously know and remember this is the tale that merged the past with the present so to force a philosophical rethink and expose what is this has made the improbable probable and the impossible possible this is the search for truth that unfolds with the story of the ancients

war endlessly tries to mask itself the myth of the heroic soldier testing his individual courage stands in stark contrast to the reality of mass anonymous death and the suppression of individual actions murder in our midst shows that this fundamental tension reached its natural conclusion in the holocaust and that disguising it has required an ongoing effort to misrepresent war and the holocaust as something other than industrial killing examining a broad range of the representations of war s horrors from scholarly depictions to those in popular literature poetry art and the movies omer bartov finds they have some things in common societies and cultures have attempted to form coherent images of horrific events to draw didactic lessons from them and to exploit them to legitimate ideological or political positions made up of interconnected essays this book is both a scholarly and an often personal and passionate examination of the emergence implementation and representation of industrial killing bartov draws out the links between

recent revisionist attempts to minimize and deny the holocaust and hollywood's ongoing fascination with national socialism and hitler's final solution arguing that the modern predicament reflects the effects of the nazi genocide on current perceptions of war history and memory this book is a plea for compassion and commitment in an increasingly violent and indifferent world
