Wound Bed Preparation in Practice 2004

the surprising story of the army's efforts to combat PTSD and traumatic brain injury the wars
in Iraq and Afghanistan have taken a tremendous toll on the mental health of our troops in
2005 then Senator Barack Obama took to the Senate floor to tell his colleagues that many of
our injured soldiers are returning from Iraq with traumatic brain injury which doctors were
calling the signature wound of the Iraq war alarming stories of veterans taking their own
lives raised a host of vital questions why hadn't the military been better prepared to treat
post-traumatic stress disorder PTSD and traumatic brain injury TBI why were troops being
denied care and sent back to Iraq why weren't the Army and the VA doing more to address these
issues drawing on previously unreleased documents and oral histories David Kieran tells the
broad and nuanced story of the Army's efforts to understand and address these issues
challenging the popular media view that the Iraq war was mismanaged by a callous military
unwilling to address the human toll of the wars the story of mental health during this war is
the story of how different groups soldiers veterans and their families anti-war politicians
researchers and clinicians and military leaders approached these issues from different
perspectives and with different agendas it is the story of how the advancement of medical
knowledge moves at a different pace than the needs of an army at war and it is the story of
how medical conditions intersect with larger political questions about militarism and foreign
policy this book shows how PTSD TBI and suicide became the signature wounds of the wars in
Iraq and Afghanistan how they prompted change within the Army itself and how mental health
became a factor in the debates about the impact of these conflicts on US culture
