Ebony 2000-03 a legend in the car industry reveals the philosophy that s starting to turn general motors around in 2001 general motors hired bob lutz out of retirement with a mandate to save the company by making great cars again he launched a war against penny pinching office politics turf wars and risk avoidance after declaring bankruptcy during the recession of 2008 gm is back on track thanks to its embrace of lutz s philosophy when lutz got into the auto business in the early sixties ceos knew that if you captured the public s imagination with great cars the money would follow the car guys held sway and gm dominated with bold creative leadership and iconic brands like cadillac buick pontiac oldsmobile gmc and chevrolet but then gm s leadership began to put their faith in analysis determined to eliminate the waste and personality worship of the bygone creative leaders management got too smart for its own good with the bean counters firmly in charge carmakers and much of american industry lost their single minded focus on product excellence decline followed lutz s commonsense lessons with a generous helping of fascinating anecdotes will inspire readers at any company facing the bean counter analysis paralysis menace

Marketing 1999-07 mary barra s quest to move gm to a manufacturer of electric cars has captured the attention of automobile aficionados green business advocates and leaders of all types who have to admire mary s toughness in moving forward despite the overwhelming obstacles in her path a decade ago no one would have guessed that gm would be the company poised to lead america into the future at a time when business book readers seem endlessly fascinated by soaring tech giants like amazon and netflix and ill fated startups like wework and theranos why is it important to put the spotlight back on 112 year old gm because charlie wilson s quip from 1952 is still true what s good for gm is still good for america and vice versa america needs to transition to a new era of clean energy and environmentally sustainable transportation we also need to adapt to a world with far fewer assembly line jobs but far more skilled jobs for

people who can design build and operate robots and other high tech machines gm s attempt to lead those transitions is as important as it is dramatic equally compelling is the story of gm s ceo mary barra who against all odds took the reins at gm in 2014 since that time she has attempted to reinvent a century old company and equip it for the biggest change in transportation since the internal combustion engine replaced the horse in the process she has been ripping out gm traditions by the roots and taking flak from all sides her plan is to make gm the company famed for the gas burning corvette hulking cadillac escalade and carbon spewing silverado pickup purely electric and clean by 2035 she may not be as wealthy as jeff bezos as brash as elon musk or as powerful as mark zuckerberg but mary barra is just as important as any of them and as one of the most powerful female executives in the world she is overdue for an in depth look at her forward thinking vision her approach to leadership and her accomplishments against the odds
