2002

this easy to use guide covers troubleshooting tips and tricks for mac hardware and software written by the well known macworld columnist and macintosh guru chris breen the book contains troubleshooting tips and techniques for both mac os 9 and os x and additional projects for making a macintosh more productive sharing files making mac os x work more like mac os 9 and more

Independent Power Projects in Sub-Saharan Africa

2016-04-18

inadequate electricity services pose a major impediment to reducing extreme poverty and boosting shared prosperity in sub saharan africa simply put africa does not have enough power despite the abundant low carbon and low cost energy resources available to sub saharan africa the region s entire installed electricity capacity at a little over 80 gw is equivalent to that of the republic of korea looking ahead sub saharan africa will need to ramp up its power generation capacity substantially the investment needed to meet this goal largely exceeds african countries already stretched public finances increasing private investment is critical to help expand and improve electricity supply historically most private sector finance has been channeled through privately financed independent power projects ipp supported by nonrecourse or limited recourse loans with long term power purchase agreements with the state utility or another off taker between 1990 and 2014 ipp have spread across sub saharan africa and are now present in 17 countries currently there are 125 ipp with an overall installed capacity of 10 7 gw and investments of 24 6 billion however private investment could be much greater and less concentrated south africa alone accounts for 67 ipp 4 3 gw of capacity and 14 4 billion of investments the remaining projects are concentrated in a handful of countries the objective of this study is to evaluate the experience of ipp and identify lessons that can help african countries attract more and better private investment at the core of this analysis is a reflection on whether ipp have in fact benefited sub saharan africa and how they might be improved the analysis is based primarily on in depth case studies carried out in five countries including kenya nigeria south africa tanzania and uganda which not only have the most numerous but also among the most extensive experience with ipp

Statutory security of supply report

2011-11-08

the government and ofgem are required to report annually to parliament on the availability of electricity and gas for meeting the reasonable demands of consumers in great britain this is the second annual report of this title previously known as energy markets outlook this is a technical report focusing on gas and electricity other fuels coal nuclear fuel renewables are also mentioned in the electricity chapter in the context of electricity generation a chapter on oil is included for completeness though not a statutory requirement the projection of peak demand for electricity remains at 60gw whilst generation capacity stands at 90 2gw however the coming decade will see many changes in the electricity markets with the closure of a number of coal and oil fired plant that are considered too polluting by modern standards and nuclear plant that are scheduled to come to the end of their working lives new plant being built or going through the planning process and renewable projects will replace the capacity due to close with cleaner technologies enhance security of supply the security of gas supply is in the short to medium term broadly benign in the near term though it is not risk free it is the medium to long term that will be challenging whilst uk production is forecast to decline there is an increasingly large and diverse range of import sources on which to draw the report also looks at the security of supply of oil transport accounted for 75 per cent of final consumption of oil products in 2010 significant reductions in oil demand are not expected over the next 20 years as the transport sector is the main consumer of oil and will continue to be heavily dependent on it over this period uk oil production is declining and oil imports are forecast to increase in response to this decline

Limits to Climate Change Adaptation

2017-11-15

this book sheds new light on the limits of adaptation to anthropogenic climate change the respective chapters demonstrate the variety of and interconnections between factors that together constitute the constraints on adaptation the book pays special attention to evidence that illustrates how and where such limits have become apparent or are in the process of establishing themselves and which indicates future trends and contexts that might prove helpful in understanding adaptation limits in particular the book provides an overview of the most important challenges and opportunities regarding adaptation limits at different temporal jurisdictional and spatial

scales while also highlighting case studies projects and best practices that show how they may be addressed the book presents innovative multi disciplinary research and gathers evidence from various countries sectors and regions the goal being to advance our understanding of the limits to adaptation and ways to overcome or modify them

Overarching national policy statement for energy (EN-1)

2011-07-19

this national policy statement nps sets out national policy for the energy infrastructure a further five technology specific npss for the energy sector cover fossil fuel electricity generation en 2 isbn 9780108510786 renewable electricity generation both onshore and offshore en 3 isbn 9780108510793 gas supply infrastructure and gas and oil pipelines en 4 isbn 9780108510809 the electricity transmission and distribution network en 5 isbn 9780108510816 and nuclear power generation en 6 isbn 9780108510823 an impact assessment is also available isbn 9780108510830 the npss have effect on the decisions by the infrastructure planning commission on application for energy developments this statement outlines the government s objectives for the power sector in order to meet its energy and climate change strategy it sets out the need for new energy infrastructure and the assessment principles and generic impacts

Occupational Noise Management

2005-01-01

climate change is a cause for concern both globally and locally in order for it to be tackled holistically its governance is an important topic needing scientific and practical consideration climate change governance is an emerging area and one which is closely related to state and public administrative systems and the behaviour of private actors including the business sector as well as the civil society and non governmental organisations questions of climate change governance deal both with mitigation and adaptation whilst at the same time trying to devise effective ways of managing the consequences of these measures across the different sectors many books have been produced on general matters related to climate change such as climate modelling temperature variations sea level rise but to date very few publications have addressed the political economic and social elements of climate change and their links with governance this book will address this gap furthermore a

particular feature of this book is that it not only presents different perspectives on climate change governance but it also introduces theoretical approaches and brings these together with practical examples which show how main principles may be implemented in practice

The Electrical Review

1981

winner of the 2016 lambda literary award for bisexual fiction i read the life and death of sophie stark with my heart in my mouth not only a dissection of genius and the havoc it can wreak but also a thunderously good story emma donoghue new york times bestselling author of room this novel is perceptive subtle funny and lingers in unexpected ways the analysis of a woman who puts her art above all else is equal parts inspiration and warning story anna north makes prose look easy lena dunham gripping and provocative the life and death of sophie stark is a haunting story of fame love and legacy told through the propulsive rise of an iconoclastic artist sophie stark begins her filmmaking career by creating a documentary about her obsession daniel a college basketball star but when she becomes too invasive she finds herself the victim of a cruel retribution the humiliation doesn't stop her visionary and unapologetic sophie begins to use stories from the lives of those around her to create movies and as she gains critical recognition and acclaim she risks betraying the one she loves most told in a chorus of voices belonging to those who knew sophie best the life and death of sophie stark is an intimate portrait of an elusive woman whose monumental talent and relentless pursuit of truth reveal the cost of producing great art it is not only a dissection of genius and the havoc it can wreak but also a thunderously good story emma donoghue

Climate Change Governance

2012-07-30

climate change presents the united states and the world with regulatory problems of a magnitude complexity and scope unseen before the united states however particularly after the mid term elections of 2010 lacks the political will necessary to aggressively address climate change most current books focus on climate change ending dirty energy policy argues that the us will not adequately address climate change until it transforms its fossil fuel energy policy yet there are signs that the country will support the transformation of its century old energy policy from one that is dependent on fossil fuels to a low carbon energy portfolio a transformative energy policy that favors energy efficiency and renewable resources can occur only after the us has abandoned the traditional fossil fuel energy policy has redesigned regulatory systems to open new markets and promoted competition among new energy providers and has stimulated private sector commercial and venture capital investment in energy innovations that can be brought to commercial scale and marketability

The Life and Death of Sophie Stark

2015-05-19

the development and implementation of an appropriate infrastructure to support the successful introduction of nuclear power and its safe secure peaceful and sustainable application is an issue of central concern especially for countries that are considering and planning their first nuclear power plant in preparing the necessary nuclear infrastructure there are several activities that need to be completed these activities can be split into three progressive phases of development this publication provides a description of the conditions expected to be achieved by the end of each phase to assist with the best use of resources milestones refer to the conditions necessary to demonstrate that the phase has been successfully completed

Proceedings of the Fifth London International Carbon and Graphite Conference

1978

the study explains a hypothesis that the human race has descended from some ape like stock by a series of changes which began and until recently were maintained by the practice of hunting in pack for animal food instead of being content with the fruits and other nutritious products of the tropical forest

Computer Organization and Design

2011-10-26

this casebook integrates a legal assessment of energy resources with economic and environmental issues thereby encouraging thoughtful analysis of energy policy issues confronting the u s and the world historical and contemporary legal issues confronting a range of energy resources are surveyed including water power coal oil and gas electricity and nuclear power particular attention is paid to the need to reduce consumption of imported oil by motor vehicles the third edition of the book contains considerable material on problems presented by climate change including legal issues confronting renewable power projects and various conservation measures we believe that the material can be taught in many different variations and we continue to teach it in a somewhat different order every time it is offered

Metal Construction

1981

this draft national policy statement nps reiterates the government s policy on the need for new nuclear power in england and wales set out in meeting the energy challenge a white paper on nuclear power cm 7296 2008 isbn 9780101729628 a strategic siting assessment has taken place in 2009 and informs this draft nps this document outlines the policy on assessment of development consent applications to be followed by the infrastructure planning commission policy on consideration of alternative sites and the government s policy on the siting of nuclear power stations and management and disposability of radioactive waste policy and guidance for the

ipc when considering nuclear specific impacts and siting issues is also covered the bulk of the nps deals with detailed assessment of the ten sites nominated as part of the strategic siting process bradwell braystones hartlepool heysham hinkley point kirkstanton oldbury sellafield sizewell wylfa all are at or near existing nuclear power facilities

Ending Dirty Energy Policy

2011-06-20

there are fewer grounds today than in the past to deplore a north south divide in research and innovation this is one of the key findings of the unesco science report towards 2030 a large number of countries are now incorporating science technology and innovation in their national development agenda in order to make their economies less reliant on raw materials and more rooted in knowledge most research and development r d is taking place in high income countries but innovation of some kind is now occurring across the full spectrum of income levels according to the first survey of manufacturing companies in 65 countries conducted by the unesco institute for statistics and summarized in this report for many lower income countries sustainable development has become an integral part of their national development plans for the next 10 20 years among higher income countries a firm commitment to sustainable development is often coupled with the desire to maintain competitiveness in global markets that are increasingly leaning towards green technologies the quest for clean energy and greater energy efficiency now figures among the research priorities of numerous countries written by more than 50 experts who are each covering the country or region from which they hail the unesco science report towards 2030 provides more country level information than ever before the trends and developments in science technology and innovation policy and governance between 2009 and mid 2015 described here provide essential baseline information on the concerns and priorities of countries that could orient the implementation and drive the assessment of the 2030 agenda for sustainable development in the years to come

Milestones in the Development of a National Infrastructure for Nuclear Power

2015

the may 2007 white paper meeting the energy challenge a white paper on energy cm 7124 isbn 9780101712422 set out the government s international and domestic

strategy to address the two main challenges tackling climate change by reducing carbon dioxide emissions and ensuring clean and affordable energy as the country becomes increasingly dependent on imported fuel an online consultation on nuclear power and the role of the private sector direct gov uk nuclearpower2007 was produced at the same time this white paper sets out the government s decision taken in response to the consultation the government believes it is in the public interest that new nuclear power stations should have a role to play in the country s future energy mix alongside other low carbon sources that energy companies should have the option of investing in them and that the government should take active steps to open up the way to the construction of new nuclear power stations it will be for the energy companies to fund develop and build the new stations including meeting the full costs of decommissioning and their full share of waste management costs section 1 summarises the consultation process section 2 addresses the key issues that arose from the consultation and how they have been taken into account in shaping policy and reaching conclusions section 3 outlines the facilitative actions the government will take to reduce the regulatory and planning risks associated with investing in new nuclear power stations finally there are three annexes alternatives to nuclear power justification and strategic siting assessment processes regulatory and advisory structure for nuclear power

2015-11-09

these books provide a range of opinions on a social issue each volume focuses on a specific issue and offers a variety of perspectives e g eyewitness accounts governmental views scientific analysis newspaper accounts to illuminate the issue this title explores whether climate change is overstated whether adaptation or mitigation is a better approach to climate change the impact of climate change including relocation of populations the impact on animal and plant species food security a greenhaven press s at issue series provides a wide range of opinions on individual social issues enhancing critical thinking skills each at issue volume is an excellent research tool to help readers understand current social issues and prepare reports

The Heroic Age

1912

in ethnic identity and minority protection designation discrimination and brutalization thomas w simon examines a new framework for considering ethnic conflicts in contrast to the more traditional theories of justice simon s theory of injustice shifts focus away from group identity toward group harms effectively making many problems such as how to define minorities in international law dramatically more manageable simon argues that instead of promoting legislative devices like proportional representation for minorities it is more fruitful to seek adjudicative solutions to racial and ethnic related conflicts for example resources could be shifted to quasi judicial human rights treaty bodies that have adopted an injustice approach this injustice approach provides the foundation for kosovo s case for remedial secession and helps to sort out the competing entitlement claims of malays in different countries indeed the priority of thomas w simon s ethnic identity and minority protection is to ensure

the tales of designation and discrimination told at the beginning of the work do not become the stories of brutalization told at the end in short the challenge tackled in this text is to assure that reason reigns over hate

Meeting the energy challenge

2008-01-10

in the light of international concerns over the harmful effects of tobacco smoking the fao has undertaken a project involving a number of studies which examine various aspects of the global tobacco economy this is the second study in the series and focuses on the potential effects of reduced global demand on the economic conditions earnings and food security of farming communities in developing countries dependent on tobacco production it contains case studies of the tobacco economy in brazil china india malawi turkey and zimbabwe as well as a literature review of key issues including tobacco supply and demand cigarette advertising and promotion taxation and the social costs of smoking
