Operator's, Organizational, DS, GS, and Depot Maintenance Manual 1974

1.5L petrol engines including EFI

Naval Aviation News 1992

A manual of the Malay language with an introductory sketch of the Sanskrit element in Malay. William Edward Maxwell, the language which I have endeavoured to illustrate in the following pages is the Malay of the British settlements in the Straits of Malacca, some knowledge of which I have had the opportunity of acquiring during sixteen years' service in Penang province, Wellesley, Malacca, Singapore, and Perak. Dialectical peculiarities are so abundant in Malay that it is impossible to teach the colloquial language of the people without imparting to the lesson the distinct marks of a particular locality. In parts of India it is said proverbially that in every twelve kos there is a variation in the language, and very much the same might be said of the Malay Peninsula and adjacent islands. The construction of the language and the general body of words remain of course the same, but in every state or subdivision of a state there are peculiar words and expressions and variations of accent and pronunciation which belong distinctively to it. Words common in one district sound strangely in another, or it may be they convey different meanings in the two places. Even words of such constant occurrence as the personal pronouns 'I' and 'you' vary according to locality. The Kedah accent is easily distinguished from that of Patani, and that again from the speech of Trengganu and Pahang. Certain expressions common in Penang are almost unintelligible in Malacca and Singapore, and vice versa. In Perak it is not difficult to say whether a man comes from the upper or lower reaches of the river by merely noting particular words in his conversation. Even individual villages and districts have their peculiar twang or their tricks of expression not found elsewhere in Java, Sumatra, and other islands eastward in which Malay is spoken. The pronunciation and character of the language are much influenced by the other languages current there. Malay is only spoken in perfection in places where the natives speak no other tongue. We are delighted to publish this classic book as part of our extensive Classic Library collection. Many of the books in our collection have been out of print for decades and therefore have not been accessible to the general public. The aim of our publishing program is to facilitate rapid access to this vast reservoir of literature, and our view is that this is a significant literary work which deserves to be brought back into print. After many decades, the contents of the vast majority of titles in the Classic Library have been scanned from the original works to ensure a high-quality product. Each title has been meticulously hand-curated by our staff. Our philosophy has been guided by a desire to provide the reader with a book that is as close as possible to ownership of the original work. We hope that you will enjoy this wonderful classic work and that for you it becomes an enriching experience.

Monthly Catalog of United States Government Publications 1992

Popular Science gives our readers the information and tools to improve their technology and their world. The core belief that popular science and our readers share is that the future is going to be better, and science and technology are the driving forces that will help make it better.
