in the history of christianity the first seven ecumenical councils include the following the first council of nicaea in 325 the first council of constantinople in 381 the council of ephesus in 431 the council of chalcedon in 451 the second council of constantinople in 553 the third council of constantinople from 680-681 and finally the second council of nicaea in 787 these seven events represented an attempt by church leaders to reach an orthodox consensus restore peace and develop a

unified christendom among eastern christians the eastern orthodox oriental orthodox and church of the east assyrian churches and among western christians the roman catholic anglican utrecht and polish national old catholic and some scandinavian lutheran churches all trace the legitimacy of their clergy by apostolic succession back to this period and beyond to the earlier period referred to as the early church this era begins with the first council of nicaea in ad 325 convened by the emperor constantine i following his victory over licinius and consolidation of his reign over the roman empire nicaea i enunciated the nicene creed that in its original form and as modified by the first council of constantinople of 381 was seen by all later councils as the touchstone of orthodoxy on the doctrine of the trinity

hundreds of illustrations were made for the book as an aid to those who either don't speak english or prefer to think visually this approach is designed to be inclusive and to promote creative practice the main idea of the book is described in this passage page 154 even in this small area there is a lot of material potentially a lifetime of study the amount of information can feel overwhelming to students at any level for this reason the book is designed for self directed practice with an emphasis on what the player could do rather than what the player should do the principle is to develop your own learning process rather than following someone else's the ability to make choices is essential in finding a personal approach to the instrument pick and choose the studies that seem interesting there should be enough variety to accommodate a wide range of personalities if any particular concept or exercise has been useful as the starting point for a new creative direction then the book has done its job its purpose is not to push any dogma method or style but to open the door to options for guitarists of any background that are looking for new perspectives
