International Politics on the World Stage 2007-12-06

one of the leading texts on the ir market john rourke s international politics on the world stage provides a balanced and comprehensive study of international relations that combines theory history and current trends and events the modern international system a background history of how it evolved in its present form as well as transformations that are shaping the 21st century are presented in a straightforward accessible discussion without undermining the complexity of world political issues the text lives up to its reputation of including the latest events and developments of the world stage rourke discusses political theory including contemporary approaches such as constructivism and postmodernism in the opening chapter he brings theoretical concepts to life with illustrative examples taken from major current world events so students see how theory plays out in the real world the text covers major issues of the twenty first century such as the structure of the modern state in the international system globalisation and the political economy global security the rise of intergovernmental and nongovernmental organisations human rights and the environment these topics linked through the chapters in the text give students a grasp of the underlying patterns in world politics so that they can interpret events they see on the evening news or on the internet as in previous editions the text shows students how politics affects our everyday lives and emphasizes the importance of being politically aware making informed decisions and taking responsible action

International Politics on the World Stage 2005-06-01

provides students and instructors with the information available inviting them to explore international relations and its challenges in a straightforward accessible way a hallmark of the text is its position that international relations do matter to students and that the individual can have an impact on international relations

Hurst's the Heart, 12th Edition 2007-11-21

an all inclusive overview of cardiology in a trusted landmark reference a doody s core title essential purchase 5 star doody s review this well organized textbook begins with a thoughtful discussion of

cardiology's past and future it presents readers with the foundations of cardiovascular medicine and the basics of cardiovascular evaluation these initial chapters provide an excellent overview of topics in general cardiology from guidelines to newer diagnostic modalities such as mri ct and pet subsequently the book is organized to provide readers with a focused approach to other areas of cardiology from heart failure to electrophysiology and interventional cardiology this is a very useful reference that compiles a vast amount of information on the diagnosis and management of cardiovascular diseases in one book it continues to be one of the best overall references in this field doody's review service developed by a team of internationally renowned editors and authors hurst's the heart is synonymous with the most comprehensive and current perspectives on treating the full range of heart problems inside you'll get an incisive look at all the global advances in the diagnosis and management of cardiovascular disease including the translation of basic science research into clinical applications and integrated throughout are the latest treatment protocols acc/aha and esc treatment guidelines as well as quick reference tables and algorithms new to this edition stunning full color illustrations information from the courage trial covering the use and misuse of drug eluting stents vital coverage of advances in the treatment of pulmonary hypertension and new information on hypertrophic cardiomyopathy expert authored chapters on coronary blood flow stunning and hibernation race and ethnicity in cardiovascular disease and cardiovascular physiology up to date information on the diagnosis and management of heart failure latest guidelines for the management of atrial fibrillation new advances in curative catheter ablation of arrhythmias increased number of international contributors expanded chapters on epidemiology diagnosis and treatment of hypertension

Hurst's the Heart Manual of Cardiology, 12th Edition 2009-02-17

a complete pocket guide to diagnosing and treating the full range of heart problems a doody's core title for 2011 4 star doody's review this is an excellent counterpart to larger references including hurst's the heart 12th edition fuster et al mcgraw hill 2008 as the original intent of the authors the chapters are short succinct and well written the handbook makes excellent use of tables algorithms diagrams and figures to synthesize key aspects of cardiovascular disease and care treatment recommendations take into account current acc/aha clinical practice guidelines and are very specific about the indications for therapy the chapters are written by established experts and are well referenced its portability makes it an instant rapid access resource invaluable for physicians doing bedside rounds doody's review service

summarizing the clinical sections of Hurst's the heart 12e this point of care resource covers the key points of cardiovascular pathophysiology diagnosis and treatment in a quick access presentation making it essential for rounds at the bedside or on the wards new to this edition updated information on cardiovascular drugs highlights the latest indications important data and side effects full coverage of vital topics such as metabolic syndrome diabetes and cardiovascular disease peripheral arterial disease stroke and cardiovascular disease in the elderly current US and European practice guidelines and treatment protocols help reinforce clinical decision making translation of genetic basis of arrhythmias to clinical practice provides a solid framework for diagnostic techniques

Congenital Abnormalities and Preterm Birth Related to Maternal Illnesses During Pregnancy 2010-07-05

The major objective of our studies in the last decade was a systematic analysis of maternal diseases during pregnancy to reveal their possible adverse effects on birth outcomes the two most important factors of infant mortality were partially analyzed structural birth defects known as congenital abnormalities and preterm birth in general the objectives of scientific studies might be either to test a new hypothesis or to confirm or confront previously published results however less frequently the authors scientists have personal motivations determined by their professional activities the authors of this book are practicing physicians and genetic epidemiologists who are mainly interested in the following three practical questions 1 the possible adverse effects of pharmaceutical products the possible teratogenic potential of about 170 drugs has been evaluated very thoroughly using the data set of the Hungarian case control surveillance of congenital abnormalities HCCSCA in the last 50 years these drugs were used to treat maternal diseases and the findings of our population based case control studies will be cited in this book and are shown in the appendix at the end of the book however our long experiences showed two problems in the drug teratology in general the evaluation of clinical doses of these drugs is a particularly difficult challenge due to the modification effects of confounders this problem motivated one of the authors to establish a new model of disaster epidemiology

Data for Radioactive Waste Management and Nuclear Applications 1985

this specialized handbook on the management of radioactive waste includes information applicable to related applications

Apocalypse Five 2019-02-12

the end of the world is coming how or when scientists can't agree upon for decades earth's best line of defense has been a team of young soldiers known as the apocalypse five forced into virtual reality simulations to train for doom's day but this is no game death on the grid is brutally final and calls up the next in a long line of cadets stationed aboard the atlantis starship the a5 are celebrities thrust into the limelight by a calling they didn't choose all it takes is one unscheduled mission showing seventeen year old team leader detroit a harsh and unfathomable reality to shake the a5's belief in all they thought they knew after questioning people with the power to destroy them the team is framed for a crime they didn't commit and marked for death now the hunt is on can the apocalypse five expose the truth the starship would kill to keep hidden or will their bravery end in a public execution

Cyberpolitics in International Relations 2012

an examination of the ways cyberspace is changing both the theory and the practice of international relations

Trow's New York City Directory 1860

an exploration of walking and mapping as both form and content in art projects using old and new technologies shoe leather and gps from guy debord in the early 1950s to richard long janet cardiff and esther polak more recently contemporary artists have returned again and again to the walking motif today the convergence of global networks online databases and new tools for mobile mapping coincides with a resurgence of interest in walking as an art form in walking and mapping karen o rourke explores a series of walking mapping projects by contemporary artists she offers close readings of these projects many of

which she was able to experience firsthand and situates them in relation to landmark works from the past half century together they form a new entity a dynamic whole greater than the sum of its parts by alternating close study of selected projects with a broader view of their place in a bigger picture walking and mapping itself maps a complex phenomenon

Walking and Mapping 2016-02-12

in this inventive romantic thriller del has the power to navigate between alternate realities and the power to save multiple worlds every time someone makes a choice a new parallel world is spun off the existing one eating breakfast or skipping it turning left instead of right sneaking out instead of staying in bed all of these choices create alternate universes in which echo selves take the roads not traveled del knows this because she s a walker someone who can navigate between the worlds and whose job is to keep the dimensions in harmony but del s decisions have consequences too even though she s forbidden from walking after a training session goes horribly wrong she secretly starts to investigate other dissonant worlds she s particularly intrigued by the echo versions of simon lane a guy who won t give her the time of day in the main world but whose alternate selves are uniquely interested but falling for simon draws del closer to a truth that the council of walkers is trying to hide a secret that threatens the fate of the entire multiverse o rourke brilliantly builds an intricate and complex alternate science fiction universe that contains beautiful imagery and visualization a definite page turner school library journal

Selected Poems of Kim Sakkat 2016-12-01

cardiac arrhythmias are a major cause of death 7 million cases annually worldwide 400 000 in the u s alone and disability yet a noninvasive imaging modality to identify patients at risk provide accurate diagnosis and guide therapy is not yet available in clinical practice nevertheless there are various applications of electrophysiologic imaging in humans from ecg ct reconstructions mri to tissue doppler investigations that provide supplementary diagnostic data to the cardiologist ep laboratories are experiencing an increase in volume for both diagnostic and interventional electrophysiology studies including mapping ablation and pacemaker implants the equipment requirements for these procedures are stringent include positioning capabilities and dose management this book is designed to review all of

the current imaging methodologies that assist in diagnosis within the electrophysiology department

Dissonance 2014-07-22

this book distills the essential elements of world politics both the enduring characteristics as well as the revolutionary changes that may be altering the very fabric of the centuries old state system author j martin rochester explores all the important topics that one would expect to find in an ir text war diplomacy foreign policy international law and organization the international economy and more but injects fresh perspectives on how globalization and other contemporary trends are affecting these issues in addition the author does so through a highly engaging lively writing style that will appeal to today s students fundamental principles of international relations is a tightly woven treatment of international politics past and present drawing on the latest academic scholarship while avoiding excessive jargon and utilizing pedagogical aids while avoiding clutter rochester ultimately challenges the reader to think critically about the future of a post cold war and post 9 11 world that is arguably more complex if not more dangerous than some previous eras with the potential for promise as well as peril

Cardiac Imaging in Electrophysiology 2011-11-15

presents controversial issues in a debate style format designed to stimulate student interest and develop critical thinking skills this work is framed with an issue summary an issue introduction and a postscript it also includes an instructor s manual with testing material

Principles of Management 2022-03-25

unnatural states is a radical critique of international theory in particular of the assumption of state agency that states act in the world in their own right peter lomas argues that since the universal states system is inequitable and rigid and not all states are democracies anyway this assumption is unreal and to adopt it means reinforcing an unjust status quo looking at the concepts of state nation and agency lomas sees populations struggling to find an agreed model of the state owing to inherited material differences and unsurprisingly among theorists of the nation only controversy and a great confusion of terms meanwhile the functional incarnations of the state agent are caricatures the mandarin

state the lawyer state the landlord state the heir to history state and the patriot state yet recent developments in international theory constructivism scientific realism postmodernism sacrifice state agency only at the price of an unhelpful abstraction the states system is dysfunctional and obsolete lomas contends and international theory must be recast with morality as central to inspire and to guide historic change he focuses in his conclusion on prescriptions for change led by four moral concerns human rights weapons of mass destruction relations between rich and poor societies and the environment i begin this book writes lomas with the commonest commonplace of international theory to expose it as a meaningless cliché in the masterly hands of hobbes it was elaborated into a shock formula for organized society a reading of history as civilization's failure kant sought to rescue morality from hobbes and create the structures of modernity but kant's influence is coming to an end in the cold war politicians disagreeing over another philosopher almost brought the world to an end hence the challenges of our time these are primary and profound philosophers have done much to define the modern world the point of international theory is to change it

Taking Sides 2007

as a walker between worlds del is responsible for the love of her life and the fate of millions in this thrilling sequel to dissonance as school library journal raves o rourke brilliantly builds an intricate and complex alternate science fiction universe fans will be longing for the next installment del risked everything to save simon and now he's gone off in another world with no way for del to find him she's back at the consort training to be a walker like everyone in her family but the free walkers have other plans for her this rebel group is trying to convince del that the consort is evil and that her parents are unwittingly helping the consort kill millions of people the free walkers make del the ultimate promise if del joins their fight she will be reunited with simon in agreeing del might be endangering her family but if she doesn't innocent people will die and simon will be lost to her forever the fate of the multiverse depends on her choice

Unnatural States 2015-07-21

echocardiography pocket guide the transthoracic examination was recently awarded with 4 stars for doody's book review developed for medical students residents cardiologists and sonographers echocardiography pocket guide the transthoracic examination presents a comprehensive easy to understand and practical guide to the performance and interpretation of the transthoracic examination key features include practical step by step approach to the transthoracic examination accurate depictions of echocardiographic anatomy basic principles of ultrasonography illustrated charts summarizing normal and abnormal cardiac structure and function foreword by scott d solomon md director noninvasive cardiology at brigham and women's hospital echocardiography is a manual skill unlike other imaging techniques where a patient is positioned and a technician may press a series of buttons echocardiography requires that a skilled operator apply a transducer manually to a patient's thorax moreover as echocardiography is not a tomographic technique the images obtained are neither uniform nor guaranteed to be of a certain quality or even spatial location hence the quality of the images obtained is directly dependent on that operator's skill and experience the success of the examination begins and ends at the hands of the person holding the transducer echocardiography pocket guide the transthoracic examination by bernard bulwer and José Rivero provides an introduction to cardiac imaging with echocardiography for anyone interested in learning this skill it will appeal to sonographers in training and beyond it will appeal to cardiology fellows emergency physicians and any physician or health professional interested in learning echocardiography from a hands on perspective in addition to providing an expert introduction to the process of performing an echocardiographic examination this book is expertly illustrated and will guide users through the first steps of interpreting echocardiographic images a good sonographer needs to know what to look for and how to look for it while a solid understanding of the kinds of pathology that are typically seen are essential in an echocardiographer's training the most important thing an echocardiographer can learn is to recognize normal as only then can he or she appreciate and understand deviations from normality as echocardiography transitions from a technology dominated by subspecialists to one that likely will be embraced by a growing number of practitioners there will be a growing need for very practical instruction in this art which has generally been taught by apprenticeship this shift will likely be driven by the advent of smaller more efficient and cheaper hand held and portable echocardiographic devices that are beginning to transform cardiac imaging this handbook has a central role in this transition and will provide a wide range of clinicians with a foundation for the practice o

Resonance 2006

the report on carcinogens roc is a congressionally mandated science based public health document that identifies and discusses agents substances mixtures or exposure circumstances hereinafter referred to as substances that may pose a hazard to human health by virtue of their carcinogenicity for each listed substance the report contains a substance profile which provides information on 1 the listing status 2 cancer studies in humans and animals 3 studies of genotoxicity ability to damage genes and biologic mechanisms 4 the potential for human exposure to these substances and 5 federal regulations to limit exposures eight substances have been added to this 12th ed of the report which now includes 240 listings the industrial chemical formaldehyde and a botanical known as aristolochic acids are listed as known human carcinogens six other substances captafol cobalt tungsten carbide in powder or hard metal form certain inhalable glass wool fibers o nitrotoluene riddelliine and styrene are added as substances that are reasonably anticipated to be human carcinogens figures this is a print on demand report
