NASA Apollo 11 2010-01-01 the planet is becoming increasingly urban in many ways the urbanization wave and the unprecedented urban growth of the past 20 years have created a sense of urgency and an impetus for change some 54 percent of the world population 3 9 billion people lives in urban areas today thus it has become clear that business as usual is no longer possible this new configuration places great expectations on local governments while central governments are subject to instability and political changes local governments are seen as more inclined to stay the course because they are closer to the people the voice of the people is more clearly heard for a truly democratic debate over the choice of neighborhood investments and city wide policies and programs as well as the decision process on the use of public funds and taxpayers money in a context of skewed financial resources and complex urban challenges which range from the provision of basic traditional municipal services to the newer agenda of social inclusion economic development city branding emergency response smart technologies and green investment more cities are searching for more effective and innovative ways to deal with new and old problems better cities better world a handbook on local governments self assessments is at the heart of this debate it recognizes the complex past current and future challenges that cities face and outlines a bottom line no nonsense framework for data based policy dialogue and action a common language that for the first time helps connect the dots between public investments programming urban audit self assessment and financing municipal finances self assessment it helps address two key questions too often bypassed when it comes to municipal infrastructure and services financing are we doing the right things are we doing things right better cities better world a handbook on local governments self assessments offers a bit of everything for everyone central governments will be attracted by the purposefulness and clarity of these tools their impact on local government capacity and performance building and how they improve the implementation of transformative actions for policy change city leaders and policy makers will find the sections on objectives and content instructive and informative with each issue placed in its context and strong connections between data and municipal action municipal staff in charge of day to day management will find that the sections on tasks and the detailed step by step walk through the process give them the pragmatic knowhow that they need cities partners such as bilateral and multilateral agencies banks and funds utility companies civil society and private operators will find the foundations for more effective collaborative partnerships

**Aircraft Structures for Engineering Students** 1990 why not after all no one had ever done it before it would be one of the longest of all overland journeys half way round the world from the english channel to singapore they knew that several expeditions had already tried it some had got as far as the deserts of persia a few had even reached the plains of india but no one had managed to go on from there over the jungle clad mountains of assam and across northern burma to thailand and malaya over the last 3 000 miles it seemed there were just

too many rivers and too few roads but no one really knew in fact their problems began much earlier than that as mere undergraduates they had no money no cars nothing but with a cool audacity which was to become characteristic they set to work wheedling and cajoling first they coaxed the bbc to come up with some film for a possible tv series they then gently persuaded the manufacturers to lend them two factory fresh land rovers a publisher was even sweet talked into giving them an advance on a book by the time they were ready to go their sponsors more than 80 of them ranged from whiskey distillers to the makers of collapsible buckets in late 1955 they set off seven months and 12 000 miles later two very weary land rovers escorted by police outriders rolled into singapore to flash bulbs and champagne now fifty years on their book first overland is republished with a foreword by sir david attenborough after all it was he who gave them that film
